

# Space Job Fair - Gateway to Work in Space

Join us for the Space Job Fair and take the unique opportunity to build connections with decision makers in the space industry. With a growing demand for interdisciplinary and interculturally trained talent, SSP and ISU alumni have the skills and passion companies are looking for.

Space Job Fair launched last year as an initiative by an ISU alumni to create and organise events helping people interested in a career in space. It is exciting to come to Cork and kick things off with ISU. Our goal is to become the missing link between space companies and the best graduates and workforce available, in all disciplines and experience levels. To achieve this goal, we developed an agile way to participate at the Space Job Fair, allowing physical and remote participation.

Our vision is to create and maintain a flexible platform where like-minded people come together, talking possibilities, exploring opportunities, and sharing a passion for space. As participant you will be exposed to:

- Workshops and interview trainings to prepare for the fair
- Evening events and receptions to meet employers and to network
- Company presentations
- Candidate success stories
- Discussions about the future of space jobs

## Why you should come

Whether you have just graduated or are working already, the best time for you to visit the Space Job Fair is now. It is an excellent way to meet with company representatives, to gather information on projects, and find out about internships, entry level positions, and career paths. It is your opportunity to industry insights, learn about company's hiring practices, and impress them with your skills and abilities. Focus on learning more about employment opportunities and future openings while building a stronger network in the industry. You want to do more to impress your future employer? Apply for a stage time slot and present your project, an idea, or something your are working on in your free time - make recruiting managers and company CEO's interested in you.

**Date:** 11-13th August, 2017, CIT Campus - check the website for the agenda

**Presentations by:** Mission Control Space Services, Yuri's Night, 4th Planet Logistic, alumni and space organisations, and many more

Registration for participants [www.spacejobfair.com/ssp17](http://www.spacejobfair.com/ssp17)

Additional information, dates, speakers, and candidate checklists will be provided on the website.

*"Space exploration has always been an exciting challenge for humanity, but, it's worth pursuing the dreams with passion. I believe, the space job fair created an organized platform availing broad access to space enthusiasts to learn and explore more about Space and express their talent explicitly to contribute in future space exploration. Space job fair provides opportunity to create a network and a platform to share passion with the next generation of space travelers."*

- **Avishek**, ISU MSS15; B.Sc. Physics; India.
